

VXL Fusion Premium

QUICK FACTS

PERPETUAL LICENSE - LIFETIME OWNERSHIP

VXL Fusion Premium comes with a perpetual license for lifetime ownership rather than a monthly subscription. A perpetual license eliminates recurring costs other than optional annual support costs and ensures outright control of your IT estate.

HIGHLY SCALABLE

Built on Microsoft architectures, Fusion UEM installations are highly scalable and support load balancing solutions such as HAPROXY®. High Availability and DR solutions such as those provided by VMware® and Microsoft®, as well as third parties such as Doubletake® and Neverfail® are fully supported.

DEVICE MANAGEMENT & ENROLMENT

Supports all Windows desktop, laptop and tablet PCs, Windows Embedded and CloudDesktop OS Linux thin clients, together with Windows-based thin clients from third parties. PCs and laptops converted for 'thin' use with CloudDesktop PC Repurposing are also manageable using VXL Fusion Premium.

PATCH MANAGEMENT

Fusion Premium fully supports Windows OS patch management using either direct methods or WSUS. Patches can be downloaded or synchronized with WSUS, following which an approval workflow is in place for strict compliance.

DEVICE PROVISIONING

With Fusion Premium, you can efficiently provision desktops, laptops and tablets powered by Windows operating systems, as well as Windows Embedded and CloudDesktop OS thin clients using group profiles and templates.

INVENTORY AND ASSET MANAGEMENT

Asset management ceases to be a chore with Fusion Premium – see all your devices, in real time, and generate comprehensive reports.

SOFTWARE METERING

Software metering management allows efficient use of licenses and helps prevent over purchasing.

APPLICATION MANAGEMENT

Manage applications easily – including remote deployment, provisioning and installation, updates and secure removal.

GDPR & SECURITY MANAGEMENT

Helps you comply with the latest GDPR data protection regulations. Keep devices, corporate applications and data secure, in real time – for all devices, regardless of location.

BROWSER-BASED ADMINISTRATION

Built for today and tomorrow, VXL Fusion Premium can be accessed and used using your favourite browser. Everything is just a click or two away.

REMOTE CONTROL

VXL Fusion Premium supports remote control using VNC and RDP.

BROWSING CONTROL AND MONITORING

Manage device browsers easily – restrict access to corporate intranets and defined websites.

MONITORING AND MAINTENANCE

Monitor defined devices parameters in real time and perform maintenance tasks and actions based on rules.

WHY YOU SHOULD USE FUSION PREMIUM MANAGEMENT SOFTWARE

ENTERPRISE GRADE

Fusion Premium is a true, enterprise grade management tool capable of managing and configuring tens of thousands of devices.

HIERARCHICAL GROUPING

All enterprise computing is broken into manageable groups, and Fusion Premium allows you to manage your network of devices in just such a manner.

TASKS AND TEMPLATES

Equipped with a state-of-the-art task definition and managing architecture, Fusion Premium makes the handling of tasks and task templates extremely efficient.

SOFTWARE DEPLOYMENT

Whether you wish to clone one Thin Clients to another, clone the settings and connection profiles, or simply install or un-install software, Fusion Premium handles it.
